
(a) Estimated perturbation angle
↑ Anterior
← Medial
↓ Posterior
Lateral →
Anteroposterior (% body height)
Mediolateral (% body height)
Anterior
−30°
−45°
−60°
−75°
Medial −90°
−105°
Lateral
Posterior
Estimated perturbation angle
(direction of the CoM motion)
(b) Perturbation intensity
Peak perturbation force (N)
UCS, n = 276 trials
NI - condition
SI - condition
Stepping foot at t_begin (mean)
Other foot at t_begin (mean)
